1 Introduction

1.1 Problem Statement

Human life is very hectic these days. People are busy with their works and don't get sufficient time even to have food properly. In these hectic schedules also people show interest to surf through different social networking sites. They do spend lots of time on these sites.

1.2 What is Glancify?

Motivated by above mentioned time constraint, we planned to create a google chrome extension that will arrange all the notifications from different social networking sites in a sorted manner which would help the users to have a quick glance over their notifications which will in turn save their time.

1.3 Why Glancify?

To provide updates to the user about all the stuff happening on their social networks without wasting users time. To make all these updates easily reachable by providing them the compact form of their notifications on a new tab page. (reachable because the new tab can be opened in any web browser easily)

2 Scope

This is the very wide scope project, mainly because there are very few constraints. Any user who has internet access and is socially active, can use this product. Also, the fact that social networking platforms are used all around the globe, the people who belong to the above defined set are from every corner of the world and thus, the scope of this project covers a wide range of users.

3 Deliverables

- "Select the Media" popup with the list of various Social Networking Platforms.

- "ADD" button to "Select the Media" Procedure.
- "Login" button to add login to Social Media Platform and add that into a "Card".
- "Remove" button to remove "Card" and logs user out of the Social Networking Platform.
- Clicking "GOTO" button or "notifications" will redirect user to corresponding social networking platform.

4 Time Frame

| Phase | Work Schedule | Duration |
|--------|--------------------------------------|---------------------|
| First | Feasibility Report, Project Proposal | 1/09/17 - 24/09/17 |
| Second | Project Plan | 25/09/17 - 30/09/17 |
| Second | SRS | 01/10/17 - 05/10/17 |
| Second | System Test Plans & Design | 07/10/17 - 17/10/17 |
| Second | Coding & Unit Testing | 17/10/17 - 28/10/17 |
| Second | Testing | 29/10/17 - 07/11/17 |
| Third | Deployment & Maintenance | 08/11/17 - 15/11/17 |

5 Team Qualification for Project

| Member | Skills |
|------------------|---|
| Himanshu Singhal | Java,C,C++,Python,Java script,Html |
| Piyush Sikarawal | Java,Python,Html CSS,Java Script,Django |
| Saurabh | Java,Python,Php,HTML,CSS,Json |
| Deepak | Java,Php,Html,CSS,Java script. |
| Sakshee Jain | Java,Python,C++,HTML,CSS |
| Neelansh Sahai | Java,Python,Html and CSS |
